

RUSSELL ROZENBAUM

1980 Woodsman Dr, Ortonville, MI 48462 — (248) 622-6995 — rjrozenbaum@gmail.com
github.com/russell-rozenbaum — linkedin.com/in/rrozenbaum — russellrozenbaum.com

EDUCATION

University of Michigan - College of LSA

Ann Arbor, MI

B.S. Computer Science — Major GPA: 3.98/4.00 — Cumulative GPA: 3.92/4.00

Graduated: May 2025

Honors & Awards

- (3x) James B. Angell Scholar — Consecutive all A terms with 14+ credits
- 2022 Stellantis Student Awards Recipient — \$2.5k scholarship

PROFESSIONAL EXPERIENCE

Ford Motor Company

Dearborn, MI

AI Engineer

September 2025 – Present

- Architected a staged, parallelized pipeline (GCP Cloud Run Jobs, Airflow orchestration, Docling) standardizing heterogeneous ECU specification documents (PDF, DOCX, XLS, proprietary formats; **30–10,000+** pages) into a uniform structured format across **60+** ECUs for a strategic recall-prevention initiative
- Engineered per-element LLM refinement loops (tables → HTML, images → summaries, text → Markdown) and page-level reconciliation passes, hardened with deterministic lint checks and pure-functional, GCS-only stages for idempotent, traceable retries
- Cut LLM inference costs **~50%** with sublinear runtime scaling via Vertex AI batch inference, parallelizing the pipeline as a dependency-gated DAG that launches each stage as its upstream dependencies complete
- Designed deterministic and LLM-as-a-judge evaluation frameworks to validate ingestion quality at scale, ensuring **200k+** extracted ECU records met a reliable, standardized format
- Built a React retrieval agent doing hybrid RAG + Graph RAG (Elasticsearch semantic search + Neo4j traversal) for ECU dataflow analysis and failure-mode surfacing, cutting engineering query time from **> 1 week** to **< 10 minutes**; tracked user feedback and pipeline metrics in Postgres

Opus IVS

Dexter, MI

Software Engineer Intern

May 2025 – September 2025

- Built a C#/Python regression testing framework automating DriveSafe device workflows, increasing QA invoice testing throughput by **> 100×**

University of Michigan - College of Engineering

Ann Arbor, MI

Instructional Aide for EECS 476 (Data Mining)

January 2025 – May 2025

- Led **4** discussions, held weekly office hours, and refactored **3** projects for Data Mining course of **40+** students

LEADERSHIP & EXTRACURRICULARS

Sprachy

sprachy.ai

Founder & Solo Developer

December 2025 – Present

- Solo-built and shipped an AI translation app (Swift iOS + web) with a novel prime-notation system for interlinear word alignment; production infra on Supabase, Cloudflare, and Railway with CI/CD

Future of Programming Lab

Ann Arbor, MI

Undergraduate AI/PL Researcher

May 2024 – Present

- Using OCaml, Bonsai, and the OpenRouter API, designed and implemented an LLM-based code completion assistant in Hazel that completes coding tasks purely through a structure-based action language
- Implemented an editing suite in Hazel, enabling instructors to create and edit exercises from within Hazel

Russ Roze

Ann Arbor, MI

Music Producer & Artist

December 2019 – Present

- Landed placements on over **800** playlists including **12** Spotify editorial playlists

Seven Mile: Music, Arts, Coding

Ann Arbor, MI

Music Branch Co-Director, Piano Teacher

January 2023 – May 2025

- Trained **10+** teachers, organized **20+** members into weekly trips, and taught piano to Detroit-area youth

TECHNICAL SKILLS

Programming Skills: OCaml, Python, ReScript (Advanced); C#, C++, Swift, JavaScript, SQL (Proficient)

Tools & Infrastructure: GCP (Cloud Run, Vertex AI), React, Neo4j, Elasticsearch, Postgres, Airflow, LangChain, Docling, Terraform, Git

Foreign Languages: English (Native), German (B2)

Hobbies & Interests: Oil Painting, Soccer, Hip Hop Enthusiast & Producer, Gym, Field Recording
